

We will go out with hearts full of Wonder and Awe.

Walk slowly; Look carefully; Listen quietly; Thank God in your heart; Care for Creation.

This little light of mine, I'm going to let it shine.

Then all will see God's love is mine

Light

The sun warms and lights our lives.

We pray as we start this Creation Walk. We thank You for the wonderful world You made for us. You give us light in our world. Light our hearts with your love. Christ be our Light.

We can let our SMILE help light someone's life. **We can** be kind to everyone we meet today.

The Air we breathe

We cannot see the air but we believe it's there, just as we believe You are there even though we cannot see You.

We pray to thank You Father, for the air we breathe and for Your Presence.

We can be grateful that we have plentiful fresh air and a healthy life.

Land and Plants

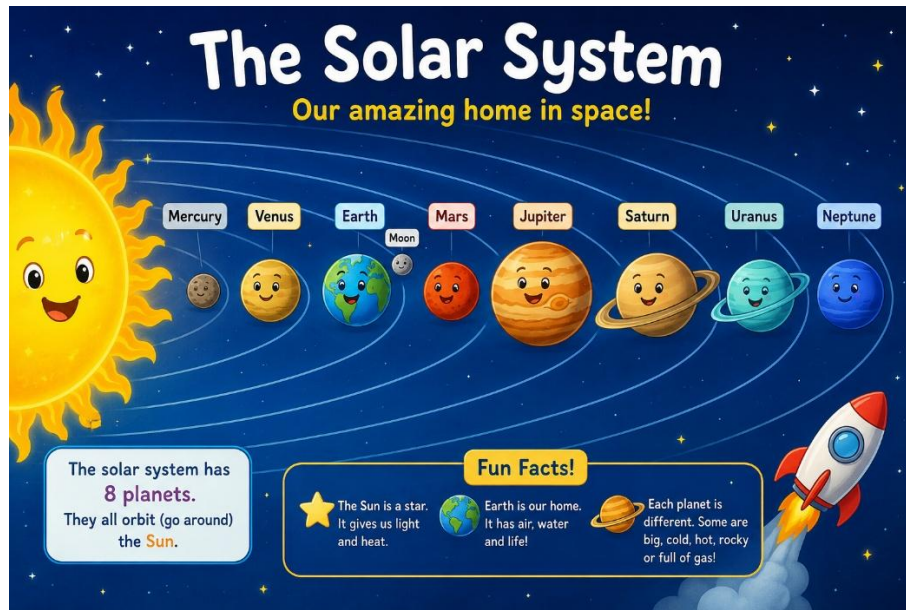

Our Earth is covered in so many different beautiful plants, even the weeds are part of God's creation.

We pray to You, Lord to help us to look at all the plants around us with open eyes that really see. Thank you for everything that grows and for our fertile land.

We can really look closely at a flower. How many different colours, shapes and sizes and parts can we see? Feel the soil, look at the stones. This is our world, a gift from God. We can take care of the land and the plants.

The Sun, Moon and Stars

Our wonderful planet Earth is part of The Milky Way Galaxy. This Galaxy in Space holds more stars and planets than anyone could ever count.

We pray: Thank You God for the sky above, for the sun, the moon and the stars.

We can look at the beautiful night sky in wonder and awe at how small we are in the Universe and thank God for His care and protection for each of us.

Water and the life in it

Almost three quarters of the earth is covered in water. Even half of our own bodies are made up of water. Without water there can be no life.

We pray that we carefully look after this wonderful gift of water and that we will never waste it or forget to say Thank You God. Thank you for the fish and all the life that lives in water.

We can find a puddle, a stream, a river. Feel the water, splash in it, if it's clean, we can taste it. We can be careful in water, sparing of it and grateful for water which gives life.

Animals, Birds and especially US

We are part of this amazing Earth which you created.

We pray, to thank You for all the animals and birds. Thank You for people who love and care for us. We pray that we will always pray for one another. Help us to protect Your creation.

We can use our gift of sight to see Your world, our ears to listen and our hearts **to** be kind to every living thing and share the beauty of the earth with joy.

We pray that we will take time to enjoy and appreciate Your wonderful Creation

“And God looked at His Creation and He saw that it was good.” Genesis 1:31
